Part of the gaslighting process is to drag out the lie until people don't care or have forgotten or are dead.

At first it was a renaming the flu symptoms and pretending it is a new deadly virus. We explained this truth in March of 2020.

Then it was take a deadly injection because the flu was renamed and they are trying to kill everyone on earth, or you will loose your job, or for a free doughnut. We also spoke up and shouted from the rooftops to over 50 million site visitors, to not take the deadly shot.

Then it was "don't worry guy, it's safe and effective". Which of course it was immediately shown it was not. Yet they did not pull it. We continued to shout, astounded that the many still did nothing.

After the first injection, in the trials, many died.

It was working exactly as they wanted.

So they rolled it out, forced 70% of the planet to commit eventual suicide. (except the saline solution group, about 30% of the first shot).

Every step of the way they lied and gaslit the masses, and are still doing so to this day; that we are not seeing loved ones drop dead due to the 'vaccine', it was washing the dishes that did them in.

For years on Truth11.com we have reported the truth about the fake virus and deadly vaccine. We have hundreds of studies, and testimonials from many doctors, articles from many writers and I have personally written volumes on the subject. At the same time, every step the main stream has delayed all truth, with a direct detriment to the health of the people, and now, after 5 years, they admit that **10** people have died from the vaccine.

Gaslighting to the extreme.

HANG THEM ALL.
